

Deep Decarbonization Pathways: Where do they lead?

Meg Argyriou, Acting CEO

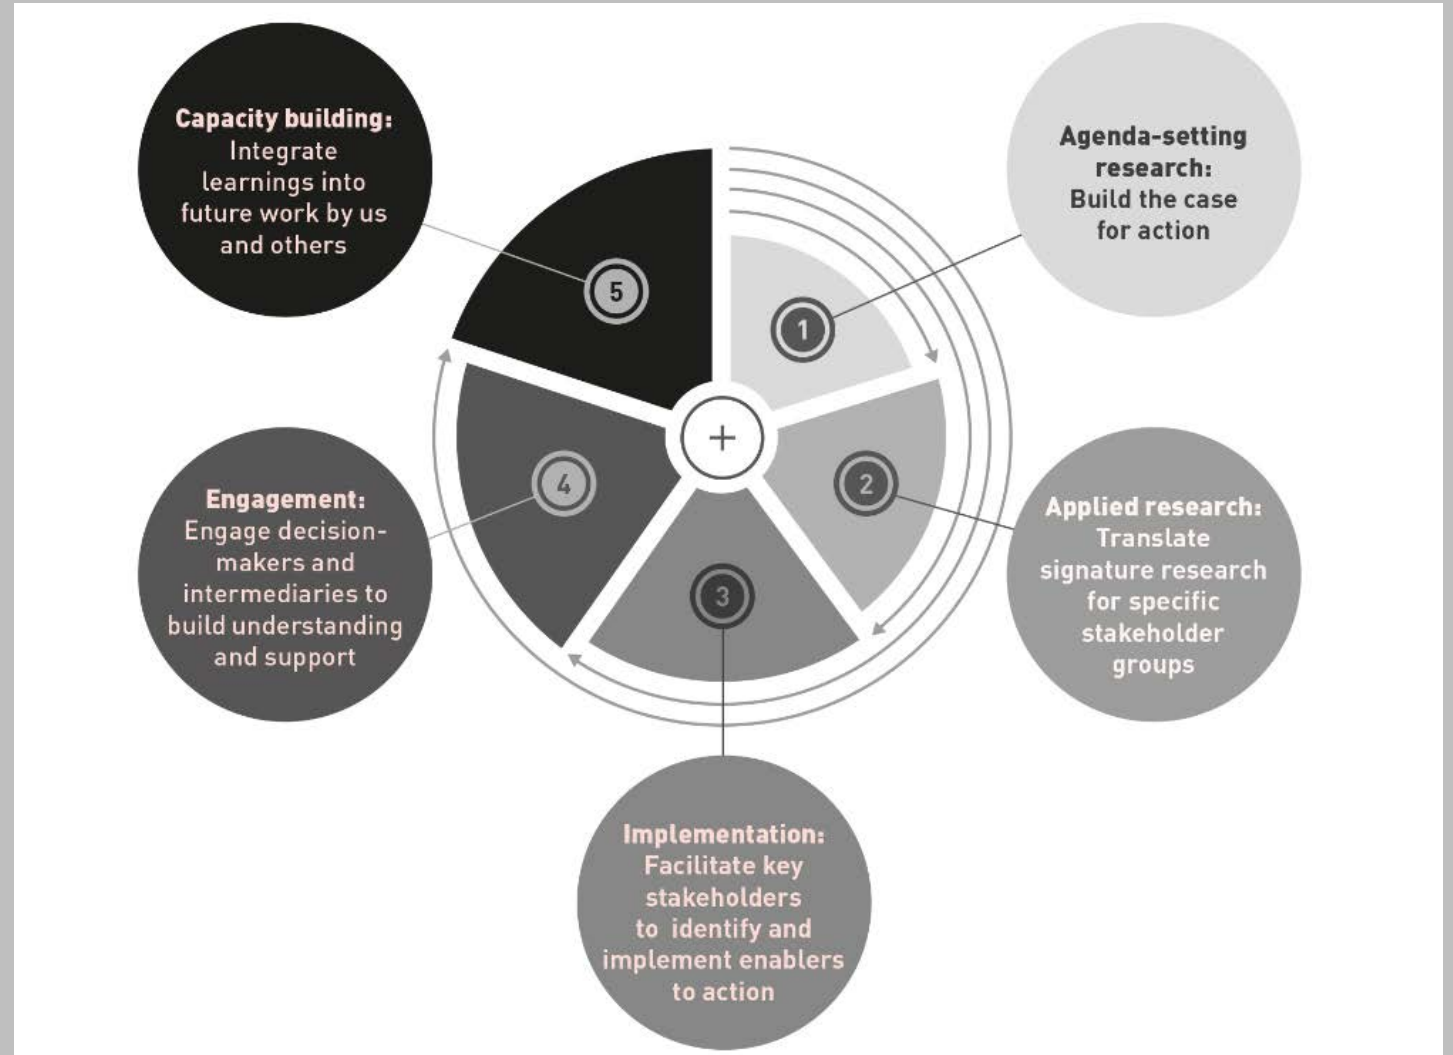

21 September 2017

ClimateWorks
AUSTRALIA

Founded in 2009 through a partnership with The Myer Foundation and Monash University and working within the Monash Sustainable Development Institute.

Our cycle of
change
underpins our
approach
translating
research into
tangible action

How can we share what we've learned
with other countries in our region?

SE Asia is one of the
world's fastest growing
regions, in both
economic growth and
emissions

SE Asia is key driver of global coal-fired power pipeline

Rank	Country	Construction pipeline	On hold	Operating
4	Indonesia	46,270	8,385	27,399
5	Viet Nam	44,757	2,800	13,394
10	South Korea	14,677	1,160	33,417
12	Philippines	13,769	926	7,282
15	Thailand	7,906	600	5,457
18	Myanmar	5,130	6,455	160
19	Taiwan	4,800	7,600	17,407
22	Malaysia	3,600	0	10,008
25	Cambodia	3,175	1,200	370
	Total MW	144,024	29,126	114,894

SOURCE: Summary of SEA countries from Table 3 :Coal Power Pipeline, Top 30 Countries, January 2017 (MW), in BOOM AND BUST 2017, CoalSwarm, Greenpeace USA, and Sierra Club

Land use change and
deforestation are also key
drivers of emissions growth
in SEA

All SDGs are inter-connected and many have strong linkages to climate action.

DDPs provide a framework for long term planning that lends itself to alignment with SDGs.

DDPs also provide a
clear roadmap to
improve access to
climate finance

THE MYER
FOUNDATION

Since ClimateWorks' launch in 2009 through a partnership between The Myer Foundation and Monash University, philanthropic support has been key to achieving our mission of catalysing Australia's transition to a prosperous, net zero emissions future. This support continues to allow us to remain truly independent, evidence-based and non-partisan.
